

STATE WATER RESOURCES CONTROL BOARD APRIL 1, 2006

We respectfully request a suspension of the Cease and Desist order which we received for 640 Manzanita Dr. Los Osos, Ca. 93402 for the following reasons.

1. We have a 1200 gallon septic tank on a lot size of 91x117 feet.
2. We are more than 50 feet above the upper aquifer.
3. The nearest testing well shows only .12 ppm.
4. Only two of us live in our house of which only one is home during the day. The other occupant works in Morro Bay 5 days a week.
5. We are being denied equal protection under the United States Constitution by being singled out when most of the prohibition zone has not yet received cease and desist orders. It means that we will have to pay for pumping, unable to obtain satisfactory loans, and unable to sell our property for full market value if we want to. While the rest of the prohibition zone not under the order will be able to do so. This is not equal protection under the law.
6. All we ask for is a level playing field where either the entire prohibition zone is served at the same time, and the order start at the same time for everyone or not at all.
7. We also request that without site specific data that we are polluting and being singled out to pump means that you should provide us with data on our specific site that our septic tank is polluting the upper aquifer.

Respectfully,

Evelyn P. Kane
Richard J. Kane
640 MANZANITA DR
LOS OSOS, CA
